Graduate Degree Program Offerings

Faculty of Education

The **Diploma in Science Teaching (DST)** is a post-baccalaureate degree program designed for science teachers at the secondary school level, those teaching introductory science courses at the tertiary level. The program has three areas of specialization: Biology, Chemistry, and Physics.

The **Diploma in Mathematics Teaching (DMT)** aims to upgrade the mathematics and pedagogical competencies of mathematics teachers in the secondary schools, as well as those engaged in mathematics curriculum and materials development.

The **Diploma in Social Studies Education (DSSE)** aim to improve the teaching competencies of educators teaching Sibika at Kultura and Hekasi in the elementary schools and social studies in the secondary schools. It is also intended for division supervisors and curriculum developers in social studies.

The **Diploma in Language and Literacy Education (DLLE)** is a post-baccalaureate program that aims to upgrade and update the knowledge and competencies of language and reading teachers. It is designed for teachers whose undergraduate training was not in English studies (including literature) or reading or language education.

The **Master of Arts in Education (Social Studies)** program is likewise designed to improve the teaching competencies of educators teaching Sibika at Kultura and Hekasi in the elementary schools and social studies in the secondary schools, division supervisors and curriculum developers in social studies. The program is laddered on to the Diploma program.

The **Master of Arts in Education (Language and Literacy Education)** program is designed to upgrade and update the knowledge and competencies of language and reading teachers. It is laddered on to the DLLE program.

The **Master of Distance Education (MDE)** is composed of six core courses (18 units) and four electives (12 units), with at least one elective course from each of the following clusters: Pedagogy, Technology Applications, and Educational Management. The capstone course is a 4-unit project (Special Problem in Distance Education). Passing a comprehensive examination is required before enrollment in the Special Problem course.

The **PhD in Education** is intended primarily for teacher educators, policy makers, researchers, and other educational personnel involved in science and mathematics education. The program aims to upgrade the capabilities of Regional Science Teaching Centers (RSTCs) and other Teacher Education Institutions (TEIs). There are four areas of specialization: *Biology, Chemistry, Physics, and Mathematics.*

The **Professional Teacher Certification (PTC)** program provides non-education graduates, who intend to teach, with 18 units of professional education courses. Education courses will be on educational psychology, principles and techniques of teaching, principles of education, measurement, and evaluation, practicum, and special education or organization and management of educational institutions.

Faculty of Management and Development Studies

The **Diploma in Research and Development Management (DR&DM)** is designed to enhance knowledge and skills in planning R&D programs; developing and promoting technologies for utilization; and managing human and organizational relations in R&D systems. It is primarily directed towards managerial leadership development.

The **Diploma/Master in Environment and Natural Resources Management (D/MENRM)** offers a ladder-type program designed to provide professionals involved in environment-related activities with a solid foundation in the art and science of environment and natural resources management, as well as a multidisciplinary perspective.

The **Diploma/Master in Land Valuation and Management (D/MLVM)** program is designed for real estate practitioners, private appraisers, government assessors and property managers. The D/MLVM

Faculty of Management and Development Studies

also caters to those with no background in land valuation and management but wish to become professionals in the industry.

The **Diploma in/Master of International Health (D/MIH)** program is designed for medical and other professionals working in the field of health and development like nursing, dentistry, veterinary medicine, allied medical professions, social work and related fields. It is intended for both entering and mid-career health professionals who are looking for graduate-level education and training that will prepare them for supervisory work in government health departments, local and international non-government organizations engaged in health and development work.

The **Master in Public Management (MPM)** aims to upgrade the administrative skills and professional competence of policy makers, public managers, administrators, practitioners of local government and administration, and individuals interested in good governance, public policy, and administration.

The **Master of Arts in Nursing (MAN)** program is designed to prepare qualified nurses in the Philippines and abroad for clinical specialization and leadership in any of the major fields of adult health nursing, community health nursing, maternal and child health nursing, and nursing administration.

The **Master of Hospital Administration (MHA)** program aims to provide hospital administrators and managers with an opportunity for continuing education and innovative advancement.

The **Master of Public Health (MPH)** program aims to provide continuing education and career development to health workers, particularly those in the countryside, that will enable them to critically assess and deal with a spectrum of public health programs.

The **Diploma in Social Work and Master of Social Work (D/MSW)** answer the demand of social work practitioners for upgrading through advanced degrees. As a response to the current need and demand for the D/MSW program, a distance education program can reach a very large number of students in as many areas as possible with minimal resources needed.

Faculty of Information and Communication Studies

The **Diploma in Computer Science (DCS)** addresses the need for advanced training of personnel in information systems. It targets corporate information officers, EDP personnel, programmers, software developers and teachers with minimal training in the field of computer science.

The **Master of Development Communication (MDC)** is a graduate degree program for communication professionals and graduates. It aims to provide communication professionals with a firmer foundation in development communication theory as well as the necessary skills in development communication work.

The **Master in Information Systems (MIS)** program is designed to provide students with advanced knowledge in information systems (IS) concepts such as internetworking, strategic (IS) planning, and IS development.

The **Doctor of Communication (DComm)** program is designed to strengthen the capability of practitioners by bringing the academic rigors of research, intellectual growth, and professional skills into the profession of communication as it is practiced in industry and academe in particular, and in society in general.
